SUMMARY

CS undergraduate exploring the intersection of web development, cloud computing, and Java. Enjoys building practical, real-world projects and has hands-on internship experience

WORK EXPERIENCE

Blockchain Technology Intern–IBM July 2025 - Aug 2026

Completed a one-month internship focused on blockchain fundamentals and real-world applications, gaining exposure to distributed ledger concepts and their use in secure, decentralized systems.

Web Developer (Paid Internship) — Tryhosting Technologies May 2026 - july 2026

– Completed a two-month paid internship building and maintaining web applications, working across front-end technologies to deliver functional, client-ready features.

PROJECTS

JanVaani — AI-Assisted Civic Grievance Platform [Link to Demo](#)

Built a zero-backend civic grievance management platform (India Innovates 2026) using HTML, CSS, and JavaScript, featuring AI-driven complaint prioritization, automatic routing across 6 government departments, real-time ticket tracking without login, and multilingual support (English, Hindi, Kannada) — reducing simulated resolution time from 72+ hours to 36 hours with a 94 percent resolution rate.

Smart Attendance — Facial Expression Recognition for Engagement Tracking [Link to Demo](#)

Built a full-stack engagement analytics platform (Cloud Hackathon 2026) using Flask, MediaPipe, and a Hugging Face Vision Transformer model to detect faces and classify emotions from classroom photos in real time. Mapped emotional states to engagement levels (Focused vs. Distracted), stored results in Firebase Firestore, and built an analytics dashboard with Chart.js — all on a zero-cost cloud stack. Owned backend development, Firebase integration, and cloud architecture.

CryptoCurrency Simulation — Front-End Platform [Link to Repo](#)

Designed and built the complete front-end for a simulated cryptocurrency trading platform, including user authentication flows (login, sign-up, forgot password) and a profile dashboard, using HTML, CSS, and JavaScript — developed as part of the IBM PBEL program

EDUCATION

2024 - 2028	Bachelor’s Degree at ABES Engineering College	(GPA: 7.9/10.0)
2023	Class 12th CBSE Board	(83 percent)
2021	Class 10th CBSE Board	(91.7 percent)

SKILLS

Web Developer	HTML, CSS, JavaScript, APIs, React
Java	DSA, RestAPI , OOPS
Cloud Computing	AWS Academy Graduate - Cloud Foundations and Architect
